

Healing from Medication Abortion Trauma

Brand: Heartbeat Academy
Product Code: 805

Price: \$9.95

Short Description

1 hour recorded webinar

Description

Join Kylee Heap, COO of Support After Abortion, and Melissa Ohden, Founder and Director of Abortion Survivors Network, for a research-focused discussion of the impact of medication abortion on women - after completed abortions and after failed/stopped/reversed abortions and how to meet their needs for healing. They will apply research findings to client care, language nuances, programming options, and marketing tips for concrete action steps in providing compassionate care, reducing barriers, and meeting people where they are to help them move past disenfranchised grief to find hope and healing.
