

To be Pro-Science is to be Pro-Life

Brand:
Product Code: 979

Price: \$14.95

Short Description

Presented by Cynthia Wood

Description

Acknowledging the miraculous gift of life has been recognized long before the electron microscope. What advancements in science has done is to make that miracle's creation not only visible to the human heart, but to the human eye. As more women are introduced to STEM, (science, technology, engineering and math), and firsthand witness that miracle of life from the moment of conception, few will be left to deny the unnecessary brutality of abortion, especially when they find themselves playing an actual part in that miracle.

This workshop explores how our early feminist mothers, doctors, and scientists described the miracle of life along and how the advancements in science prove that to be Pro-Science is to be Pro-Life.
